*Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group A. directed to the monitoring:

- a) claim 2 measuring system
- b) claims 3-5 measuring of particle speed.
- c) claim 6 temperature measurement
- d) claims 7-8 gas measurement
- e) claim 9 current/voltage measurement
- f) claim 10 powder amount measurement

Group B. directed to the material components

- i) claim 14 pure magnetite
- ii) claims 15, 18, 19 magnetite with metal additions
- iii) claims 16, 18 magnetite with intermetallic additions
- iv) claims 17, 18, 20-23 magnetite with ceramic additions

Group C. directed to the material form

- 1) claim 24 powder material with grain size
- 2) claim 25 material in wire form
- 3) claim 26 powder material made by spray drying

Art Unit: 1762

4) claim 27 powder material made by agglomeration

Applicant is required, in reply to this action, to elect a single species of each of Groups A, B and C to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

--- Note the listing of species with corresponding claims in Groups A, B and C above

The following claim(s) are generic: 1 and 11-13.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

As to Group A, the different measurement systems of species a) – f) are independent, and no claims require systems of the other species.

As to Group B, the different material components of species i) – iv) each require independent materials.

As to Group C, the different material forms of species 1) – 4) each require independent and nonoverlapping forms.

Art Unit: 1762

4. A telephone call was made to Mr. R. Bachman on April 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Bachman requested a written species requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katherine A. Bareford whose telephone number is (703) 308-0078. The examiner can normally be reached on M-F(7:00-4:30) with the First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P. Beck can be reached on (703) 308-2333. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
